U.S. OFFICIALS
ONLY

1. Experiments are at present taking place in telephoto transmissions between Karlsruhe-Koenigsweusterhausen and Berlin, formerly main reception station for transatlantic services and now a Soviet experimental station.

3. The Russians are experimenting with frequency modulations and transmission of half shade pictures (Halbtönenbilder) over multiple channels. They are aiming at higher speeds and working on the elimination of fading.

6. The Russians have asked Telefunken to set up a production center for high frequency instruments in the Lichtenburg-Koenigsweusterhausen area.
